

BRIDGETTE BEACH-BANKOLE

Orange, CT 06484 | bankole.bridgette@gmail.com | 914-720-0137 | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFILE

Computer Science student graduating in December 2026 with experience with Python applications, web applications, and data-driven software solutions. Passionate about cybersecurity, AI safety, and software engineering, with strong analytical, problem-solving, and technical communication skills.

EDUCATION

Pace University, Seidenberg School of Computer Science and Information Systems New York City, New York
Bachelor of Arts (BA) in Computer Science | **Concentration:** Information Systems December 2026

RELEVANT COURSEWORK

Database Management | Probability & Statistics | Data Structures & Algorithms | Computer Organization | Operating Systems | Unix/C Programming

TECHNICAL SKILLS

Programming Languages: Python, Java, HTML, CSS, JavaScript, SQL (MySQL)

Frameworks / Libraries: PyGame

Developer Tools: Git, Docker, VS Code

Concepts: Object-Oriented Programming, Data Structures, Relational Databases, Software Testing

ACADEMIC PROJECTS & LABS

[Finze – Loan Qualification Prototype](#) October 2025 – present

- Developed a loan estimation application using Python, HTML, CSS, and Docker, and AI-assisted development, accelerating prototyping, debugging, and testing.
- Designed a statistical model using applicant credit score, annual income, and requested loan amount to estimate financing approval probability.
- Containerized the application using Docker for reproducible deployment.
- Built as a proof-of-concept to reduce unnecessary hard credit inquiries.

[Rosebud](#) March 2024 – April 2024

- Developed a 2D arcade game in Python using Pygame.
- Implemented object-oriented programming principles, collision detection, event handling, and game state management.
- Built an interactive game play inspired by the Alien Invasion architecture.

[Pamelas Care Mission](#) (501(c)(3) Non-profit) January 2026 - present

- Developed a responsive website for Pamelas Care Mission, a 501(c)(3) non-profit organization dedicated to connecting adults with disabilities to volunteer opportunities supporting veterans.
- Collaborated with organizational stakeholders to translate business requirements into an accessible, user-friendly website.
- Designed responsive layouts and implemented modern HTML, CSS, and JavaScript to improve usability and public engagement.
- Assisted with maintaining the organization's online presence through iterative updates and enhancements.

PROFESSIONAL EXPERIENCE

Trader Joe's Las Vegas, NV/Scarsdale, NY
Section Leader/Sales Associate February 2019 – October 2023

- Managed procurement and inventory of nutritional bars for Trader Joe's, implementing an innovative ordering system to optimize stock levels.
- Collaborated with suppliers to ensure consistent product availability and resolve supply chain issues, enhancing store efficiency.

Pilgrim Furniture & Mattress City Milford, CT
Financial Data Operations Coordinator October 2025 - Present

- Manage third-party fintech integrations (Bread, Snap, Synchrony), acting as the operational expert for consumer lending and ensuring data compliance within the sales cycle.
- Execute data governance within the RetailVantage ERP system. Investigate transaction discrepancies across multiple operational systems to maintain data accuracy and ensure financial compliance.

- Monitor 35+ client accounts daily to proactively manage transaction integrity and resolve balances, mitigating financial risk and ensuring seamless order fulfillment.
- Produce detailed operational documentation and transaction records to support auditing, compliance, and cross-departmental communication.

ACTIVITIES / VOLUNTEER WORK

Women of the Word Club, Member

March 2024-Present

- Member of the Women of the Word Club, actively advancing women's leadership and empowerment through various initiatives, including counseling services for young women and fostering fellowship among Christian women of faith.

World Science Festival, Volunteer

- Devised ornate displays for participants to enhance their engagement with scientific concepts.
- Constructed hands-on, interactive experiments incorporating various scientific principles to educate and entertain the public.
- Managed preparation tasks before the event to ensure smooth execution and a memorable experience for attendees.
