RELEVANT COURSEWORK

Advanced Coding in Python | Database Management | Introduction to Probability & Statistics

TECHNICAL SKILLS

Programming Languages: Python, HTML, CSS, Java, MySQL

Software & Tools: Microsoft 365, Adobe Express

Operating Systems: Windows, MacOS

ACADEMIC PROJECTS & LABS

Personal Portfolio March 2023– May 2023

- Designed and developed a portfolio website for my podcast, Moietty, using HTML and CSS to provide a comprehensive background of my skillset, prior achievements, and mission statement.

Rosebud March 2024 – April 2024

- Modeled a game titled 'Rosebud' using Python/PyGame, based on the Alien-Invasion prototype.
- 'Rosebud' was a testament to my ability to apply my programming skills creatively. The objective was to allow the user to eliminate treats in the fleet one by one using the player, who is a cat. This fun interactive game was reminiscent of software games from the 1990s, showcasing my ability to create engaging user experiences.

Finze
- Prototype designed as a solution for soft and hard inquiries often created by financing applications.
- Uses a combination of personal factors (credit score, annual income, and loan amount) to generate the statistical likelihood of being approved for a loan

PROFESSIONAL EXPERIENCE

Trader Joe's Las Vegas, NV/Scarsdale, NY
Section Leader/Sales Associate February 2019 – October 2023

- Managed procurement and inventory of nutritional bars for Trader Joe's, implementing an innovative ordering system to optimize stock levels.
- Collaborated with suppliers to ensure consistent product availability and resolve supply chain issues, enhancing store efficiency.

Pilgrim Furniture & Mattress City Milford, CT
Financial Data Operations Coordinator October 2026 - Present

- Manage third-party fintech integrations (Bread, Snap, Synchrony), acting as the operational expert for consumer lending and ensuring data compliance within the sales cycle.
- Execute data governance within the RetailVantage ERP system, meticulously verifying client financing, complex transactions, and delivery schedules to maintain a single source of truth.
- Monitor 35+ client accounts daily to proactively manage transaction integrity and resolve balances, mitigating financial risk and ensuring seamless order fulfillment.
- Generate and analyze critical business intelligence via proprietary operational reports (CBD, ASAP, IP), using output data to inform logistics, optimize sales coordination, and support managerial decision-making.

ACTIVITIES / VOLUNTEER WORK

Women of the Word Club, Member March 2024-Present

- Member of the Women of the Word Club, actively advancing women's leadership and empowerment through various initiatives, including counseling services for young women and fostering fellowship among Christian women of faith.

World Science Festival, Volunteer

- Devised ornate displays for participants to enhance their engagement with scientific concepts.
- Constructed hands-on, interactive experiments incorporating various scientific principles to educate and entertain the public.
- Managed preparation tasks before the event to ensure smooth execution and a memorable experience for attendees.
- Acclimated new residents to their environment, providing support and assistance to ensure a smooth transition into their living arrangements.
